

Amazing & Beautiful Butterflies

only uses butterflies which are raised on butterfly farms. This helps to preserve valuable rainforest habitat by providing people in the countries where those farms are located, an alternate income other than clearing virgin tropical rainforest. Raising insects to sell provides an alternative income for indigenous people, and helps preserve their tropical forests. These butterfly specimens are from butterfly and insect farms in Australia, Asia, North, Central and Southern America rainforest areas.

Furthermore, we believe catching and using butterflies from the wild is not only uneconomical, but the specimens are invariably damaged and of no use for this type of art.

No butterflies or insects used in these displays are endangered species. All are legally imported into the United States as regulated by the US Fish and Wildlife Department.

This makes our butterfly displays the perfect environmentally friendly gift for teachers, scientists, private collectors, and anyone who appreciates the amazing beauty of butterflies.

Wooden Shadow Boxes

Our framed butterflies are mounted on several background colors, each carefully selected to enhance and compliment each butterfly and your home décor. If you would like a custom made frame, you can choose between a mirrored, classic ivory parchment, powder blue parchment, rose parchment, and celery parchment backings. Our frames also come in two shades of wood; lighter oak or a darker mahogany finish.

Note: Frames shown are on mirror backing.

Our Hand Crafted Products

Each individual creation from A & B Butterflies is hand crafted with great care resulting in one-of-a-kind artistic pieces that bring a bit of nature to life.

Custom Orders Available

If you have a favorite butterfly, we will be happy to try and locate it for you from one of our ecologically friendly suppliers, and put it in the frame or dome of your choice. For more information, visit our website.

"Moment in Time" Glass Domes

We have created natural scenes, containing real butterflies, mixtures of dried plants, real wood and delicate silk flowers. Each work of art contains one or several beautiful butterflies. Many of these butterflies are mounted with their wings at an angle, simulating real butterfly movement. Each one-of-a-kind scene is encased in a glass dome to preserve its beauty indefinitely.
